

# CHILDREN AND YOUNG PEOPLE NORTH WALES VIOLENCE SURVEY

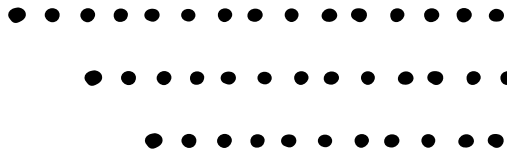

The Serious Violence Prevention Partnership is a collaboration of various organisations and services across North Wales who are passionate about providing futures without violence. This partnership would like to learn from children (up to 18yrs) and young people (up to 25yrs) about their experiences of violence across North Wales, to gain an understanding of how violence presents itself across the region and how children and young people feel agencies and services can better prevent and reduce violence to make them and their communities safer.

You can help us complete our survey because children and young people's voices, experiences, and opinions matter! Without this we cannot reflect an accurate picture of violence in North Wales from a young person's perspective or put the right services you need in the right places. **By responding to this survey, you're voices will be listened to and will help shape our services and response to violence prevention.**

**To gain a true understanding we should highlight and guarantee that this survey is completely anonymous, we will not record or trace any information in relation to your identity, we will not know who you are.** We therefore encourage you to please answer as honestly as possible in order to provide a true reflection.

As this is an anonymous survey we cannot provide you directly with any personal support and help you may need. However, should you require it, we encourage you to contact Childline 0800 1111 / [www.childline.org.uk](http://www.childline.org.uk)
